### THE 4 PHASES OF EMOTIONAL RESILIENCE

**EMPOWER**  
MINISTRY

## OVERCOMING ANXIETY Through Emotional Regulation

*Learn how to regulate, bounce back from anxiety, worry, and fear.*

We are emotional beings. Our emotional thinking leads us to many immature beliefs about ourselves and life. Unchecked, these immature beliefs will stay with us and result in emotional difficulties like anxiety. We are also adaptive and can learn regulating skills.

### YOU CAN OVERCOME ANXIETY USING EMOTIONAL REGULATION

*Overcoming our anxiety* is broken into three phases:

- **Emotional Recognition.** The ability to know when we are having an emotional episode; learning to listen to our body and senses and perceive when something is bothering us.
- **Emotional Regulation.** Building the capacity to return to peace and joy from painful emotions, allowing us to be receptive and reflective rather than reactive.
- **Emotional Relearning™.** Replace emotionally learned lies about ourselves and life with positive truth--emotionally with our mind and heart.

BOOKS BY RONALD OVITT

MEET RONALD OVITT

Ron Ovitt is an author, ordained minister, pastoral counselor, recovery coach, podcaster, and public speaker. Ron's journey has influenced his writing and speaking. He comes to this seminar with personal knowledge of anxiety and depression. His quest led him to study the integration of Christianity and Psychology.

Ron has studied both at the undergraduate and graduate level in Clinical Psychology and has participated in many different seminars and courses. Well read in the latest research, Ron has a grasp on the latest in neuroscience, trauma recovery, and anxiety and has training in practices such as Neurofeedback, EMDR, CPT, Poly Vagal Theory, Somatic Experiencing, and PTSD Growth techniques.

What is taught in this seminar is more than head knowledge. It is experiential knowledge coming from his work with people of varying backgrounds. Ron has had successful recovery and homeless ministries, and has taught Emotional Resilience to hundreds of people in-person and has an online following of thousands.

Ron's theory of Emotional Relearning™ came out of his journey and counseling with many over the years. Ron soon learned that what triggered people emotionally were deep-seated, negative beliefs about themselves, others, and life. Often outside of our awareness, we can remain at the mercy of our emotions and change can remain out of reach. Negative beliefs learned early in life were learned emotionally—embodied, felt beliefs that are real. But these negative beliefs can be exchanged with new, accurate ideas that contradict the old belief. Through this seminar, you will learn how you, too, can identify your negative beliefs and begin to replace them with a positive and life-giving truth.
